What does bretman rock identify as

Social media influencer and makeup guru Bretman Rock has captivated the attention of millions of fans on YouTube with his colorful personality (and vocabulary), iconically “beat faces,” hilarious food challenges and unapologetic authenticity. Now, after mastering the world of viral digital content, he is on to his next big thing: his very own reality show on MTV.
“I wanted to share my life,” Rock said of his decision to star in “Following: Bretman Rock,” which premiered Monday. “I wanted to share literally where I come from and where I’m going.”
In an interview with NBC News’ Snapchat show, “Stay Tuned,” he said the first challenge was figuring out filming and production in the middle of a pandemic.
“It was definitely hard, because obviously there’s so many regulations, especially like living in Hawaii,” Rock said. “We had to get tested every day ... my nose doesn’t even belong to me anymore.”
He said the bigger goal in taking his talents to MTV was to provide representation — something he lacked growing up.
“I didn’t really see anyone like me on TV,” he said. “I literally don’t even remember seeing any, like, gay Filipinos on TV until I started watching ‘Drag Race’ and saw Manila (Luzon), and I was like, ‘Oh, my God! You look like me.’”
Rock added the immigrant experience is something he wants to emphasize on his show. In the first episode, he talks to his fearful mother over dinner about her challenges bringing her family from the Philippines to Hawaii.
“I know I’m not the only kid that moved to America and had to live with 30 cousins in one house,” he said. “I kind of just wanted to be like Manila and represent ... other immigrant kids coming to America with nothing but a dream.”
And when it comes to representation, he said, it was important for him to make the show as queer as he is.
“I have six friends, and four of them are gay and two of them are two girls. So I honestly just grew up with, like, gay people, and like I grew up with my family [being] so accepting of gays,” he said. “It was very important to make the show gay as f---, period.”
He said his family’s support of his sexuality and expression made all the difference growing up.
“I’m just so blessed to have my family, to be honest, because I really would not be Bretman Rock without that and their support, and they’ve always been supportive of me,” he said.
The new show will give fans and viewers insight into Rock’s personal life, unpacking everything from his family drama to his daily life in Hawaii, which he said was important for him to set as the backdrop of the show’s first season.
“There are so many reality shows, but there’s none that really shows the island life and what influencers are in the islands. We don’t have the same resources as people in L.A. do,” he said. “I think that’s what was really important: to capture what my life is, what an influencer’s life is in Hawaii.”
But most importantly, he said, he has just one goal for young people watching his show.
“I just hope that people can see themselves in me, and that’s really all I could wish for,” he said.
Six episodes of “Following: Bretman Rock” airs Mondays at 4 p.m. ET on MTV YouTube.

A rock garden is a unique way to decorate your yard and create a positive impression with visitors. Certain landscapes are more suitable for rock gardens than others. For example, if you live in a rocky area, working creatively with rocks might achieve a more natural look in your yard than if the area is swampy. Rock gardening can be a fulfilling endeavor, allowing you to turn those rocky backyards into masterpieces blending vegetation and rock. To create a beautiful rock garden the easy way, follow these tips for beginners.
Work With a Small Garden at First
To avoid overwhelming yourself with a complicated scheme for the whole backyard, consider starting with a tiny area. The advantages of doing this are numerous, but they include ease of maintenance and lower cost. With a larger rock garden, weeding your plants takes more time. If you have a large backyard, you will be spending more hours watering the plants, arranging stones, and pruning the shrubs. A better approach is to start with just a corner of your backyard. Create your rock garden in a spot where water is easy to access. Clear a small patch for the plants and then arrange your rock garden there. The ease of maintenance will come in handy in times when you are much more busy down the line.
Minimalist Foliage With Lawn and Rock
Some of the best rock garden designs for beginners include mostly rock and minimal foliage. You might be wondering what good a rock garden will do if it’s mostly rock and has little vegetation. This combination works so well because the rocks can be arranged in a myriad of ways. For example, you can combine white and brown rocks in a circle around a patch of plain green lawn. The natural shades of rock create a wonderful, natural-looking aesthetic that highlights the attractive green of the grass. This simple but effective rock garden design requires very little effort to put together. All you need to do is cut the lawn every once in a while when it gets too tall.
Extend Wooden Floors With Rock Extensions
If your patio or deck has a wooden floor, you can create a stunning look by adding a brown rock extension into your rock garden. For example, you can add a little rock path that leads into your rock garden. The garden becomes an extension of your patio or house, fusing indoor and outdoor living. This approach creates a pleasing aesthetic. On days when you decide to barbecue, you can treat your patio and rock garden as just a single unified place. The rock garden will be an effective hosting and entertaining area.
Building around a Small Pond
If you have a pond in your backyard, you can build a rock garden around it to enhance the appeal of the entire backyard. A pond makes a good place for a rock garden because it might already use rock or stone as part of the walls that hold the water back. Some landscape designers prefer to find stone of a matching look and using that for the rock in the surrounding rock garden. If you manage to pull this off, the result can look highly sophisticated. The presence of a water body with stone creates an aged look, adding a sentimental touch to the appearance of the garden. To get an even better result, you will want some leafy trees in the backdrop. This makes a suitable backdrop for pursuits like poetry, music, or sitting down for hours in the shade with a book.
Add Colorful Flower Combinations
To enhance the visual appeal of your rock garden, you should consider adding colorful flower combinations at some point. While the minimalist look of plain grass works well for small spaces, with a larger area, there is greater need to fill in the garden with multiple varieties of flowers. For example, you can pair peack lilies with begonias to create a colorful look. In summer times when the flowers are in bloom, the garden will strike an upbeat mood.
Cactus and Rock Combinations
If you live in a dry area such as Arizona or Texas, you can make effective use of the naturally growing cacti by building rock gardens around it. The pairing of cactus and rock makes for effective outdoor decoration. You can opt for small, fuzzy cacti, which match well with small rock walls, or larger cacti for boulder-like rock outcroppings. To create a more artful look, you should pick out some painted decorative flower pots and grow various small cacti in them. You can then arrange these in lines or other patterns around your rock garden to create an eye-catching look.
